Technical Skills

Languages: TypeScript, JavaScript, Python, C#, SQL, PHP, HTML5, CSS3, Bash, YAML
Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, ASP.NET, Vue.js, Nuxt.js, AngularJS, Hono, TailwindCSS, shadcn/ui, Vite
Databases & APIs: PostgreSQL, MySQL, Neon, Prisma, Drizzle, SQLAlchemy, Alembic, REST APIs, Webhooks, Twilio, Stripe, Clerk
AI & Agentic: LLM Integration, Function Calling, LLM Evals, Agentic Engineering, Claude Code (Subagents, Skills), Gemini API, GitHub Copilot, OpenAI Codex, Cursor, IBM watsonx
DevOps & Testing: Docker, GitHub Actions, CI/CD, Vercel, Husky, Playwright, Vitest, pytest, TDD, E2E Testing, CodeQL, SonarCloud, CodeRabbit
Design & Tools: Figma, Illustrator, Photoshop, Canva, Procreate, UI/UX, Wireframing, Prototyping, Git, Jira, Trello, Agile, OOP

Experience

Vero Ventures | Full-stack Developer Intern | github.com/Vero-Ventures | insurflow.biz Jan 2026 – Aug 2026

- Co-built a multi-tenant InsurTech SaaS platform using **Next.js 14** + **TypeScript**, scaling to **500+ users** and cutting delivery time by ~37% via modular architecture and **Vercel** CI/CD + **Docker**.
- Implemented AI-driven features using **Google Gemini API**: chat-based advisory, insurance needs calculations, and life expectancy estimation, cutting manual planning effort by ~46% for 500+ users.
- Developed financial planning tools and advisor workflows, including life event simulations, insurance breakdown UIs (**React** + **Recharts**), PDF generation, and estate flow diagrams, cutting documentation time by ~32%.
- Built secure back-end and auth with **PostgreSQL** (**Neon**), **Drizzle ORM**, **Clerk**, and **Stripe**; refactoring plus **SonarCloud** and **CodeRabbit** code reviews cut production bugs by ~28%.

FPT Software | Web Developer Intern | Remote Jan 2025 – Sep 2025

- Developed and maintained internal enterprise web applications with **ASP.NET** + **C#**, serving **150+** internal users and cutting manual reporting time by ~40%.
- Built dynamic front-end interfaces with **AngularJS**, **HTML5**, and **CSS3**, improving page load speed by ~25% and reducing UI defects by ~30%.
- Established a testing pipeline with **Playwright** E2E tests and **Vitest** unit tests gated by pre-push **Husky** hooks, alongside **CodeQL** static analysis, cutting escaped defects by ~35%.
- Practiced **agentic engineering** with **Claude Code**, structuring version-controlled sub-agents and skills files governed by an **AGENTS.md** rule file defining project goals and conventions, cutting repetitive dev tasks by ~30%.

Projects

Tether | Full-stack AI Engineer | github.com/Lam-Thai/Tether | tether-web-tau.vercel.app Oct 2026 – Nov 2026

- Built a multi-tenant AI receptionist that answers calls, SMS, and chat and books appointments using **Next.js**, **FastAPI** (**Python**), **PostgreSQL**, **Twilio**, and **Google Calendar API**, with rate limiting holding spend at **$0**.
- Integrated **Google Gemini** function calling behind a FastAPI validation layer so no booking is confirmed without a backend result; built a **161-case LLM eval** harness hitting **100%** intent accuracy.
- Led **agentic engineering** in **Claude Code**: built **5** role **subagents** (back-end, front-end, AI, test, reviewer) and **7** workflow **skills** under a **CLAUDE.md** rule file, shipping **36** merged PRs in 4 weeks and cutting dev time by ~40%.
- Ran each GitHub issue through a skill-driven loop (slice plan, **TDD**, reviewer-subagent audit, PR), gated by **2,100+ pytest**/**Vitest**/**Playwright** tests and **6 GitHub Actions** CI/CD workflows, cutting review rework by ~35%.

Tandem | Full-stack Developer | github.com/IDSP-TRADECARE/Tandem | tandem-app.com Aug 2025 – Dec 2025

- Co-developed a scheduling platform for trades families, reaching **200+ users** and cutting scheduling conflicts and coordination effort by ~57% using **Next.js**, **React**, and **TailwindCSS**.
- Built a unified calendar aggregating shifts, childcare, and reminders through a responsive, component-driven UI used by 200+ families daily.
- Designed an AI ingestion pipeline converting voice/text/document inputs into structured schedules, cutting data entry time by ~63% using **IBM watsonx** and **Grok** APIs.
- Implemented auth, database, and deployment with **Clerk**, **PostgreSQL** (**Neon**), and **Vercel**, delivering a live product showcased to industry stakeholders.

Education

British Columbia Institute of Technology | Diploma, Full-stack Web Development | GPA: 3.3 Sep 2024 – May 2026
FPT University | Bachelor's Degree, Graphic Design | GPA: 3.2 Oct 2021 – Dec 2023
Hongik University | Exchange Program, Graphic Design | GPA: 3.8 Feb 2023 – Jun 2023
